### **TyrellN6: Classic racer with u-he engine**

TyrellN6 is a compact, sporty synth. Based on concepts and ideas for a hardware synth: a few modules, novel features, analogue sound and low-cost. TyrellN6 is the software version manifestation of these ideas.

## TickyClav 2

Back by popular demand comes another remastered virtual instrument by Big Tick Audio. This time its Ticky Clav, quite possibly the first virtual instrument that used physical modeling to emulate the hugely popular Hohner D6 Clavinet®, made famous by Stevie Wonder's hit song Superstition. Ticky Clav 2 continues to use physical modeling but expands the controls that made this plugin so popular.

### Cheeze Machine 2

Back by popular demand comes a remastered version of the extremely popular Cheeze Machine virtual instrument by Big Tick Audio. An extra cheesy, extra saucy string box in the style of the original vintage string machines. Cheeze Machine 2 includes an expanded oscillator section, convolution reverb, a vintage ensemble chorus, and 64 bit compatibility for VST, AU, AAX and Standalone applications.

Also included, bonus preview presets for Cheeze Machine Pro, an upcoming release with additional filters, pitch envelopes and performance controls.
