FISHMAN

USER GUIDE
Nashville Series Strings Pickups

Welcome

Thank you for making Fishman a part of your acoustic experience. We are proud to offer you the finest acoustic amplification products available; high-quality professional-grade tools which empower you to sound your very best.

Troubleshooting

If you are unfamiliar with these products, please pay close attention to the dimensional requirements for installation. Failure to do so can result in permanent damage to the pickup.

Installation by a qualified professional is strongly recommended.

Should you have any problems, please check with your installer or refer to the online installation guide for this product. Technical support, troubleshooting tips and installation information can be found at <http://www.fishman.com/support/>

Pickup Formats

M-300 Archtop • two-piece, adjustable replacement bridge for most archtop mandolins.

M-400 Flat-top • replacement bridge for flat top mandolins.

Spider-Style Resophonic • two-piece saddle for spider style resophonic guitars.

Biscuit-Style Resophonic • a complete replacement biscuit with an embedded piezo-ceramic pickup.

Plugging In

An impedance matching preamp is recommended, but not required. This will help realize the full frequency response potential of the pickup and allow for cable runs longer than 10 feet without signal deterioration. Use a high quality, low capacitance 1/4 inch shielded instrument cable. This will ensure minimal tone coloration and hum.
